

COMPATIBILITY

TALKTYPE DICTATION COMPATIBILITY DOCUMENT

TalkType Dictation work on a users Apple Mac computer. There are two core functionalities provided by the software:

Dictation

TalkType Dictation allows a user to dictate directly into any piece of software on their Mac. When enabled, the software will allow the user to dictate into their Mac and will place the transcribed text wherever the users cursor is placed. For example, if the cursor is places in Microsoft Word, the text will be placed into Microsoft Word.

Voice-Enabled Computer Control

TalkType Dictation allows a user to control their computer using their voice. The software provides hundreds of voice commands out of the box that enable the user to work both across applications and with application. An exhaustive list of all commands can be provided on request.

When working across all applications, TalkType provides voice coammnds such as “Open <application name>” to allow a user to open a specific application by voice. Many other commands are available.

TalkType also provides application specific voice commands for the following applications:

- Apple Mail
- Apple Pages
- Apple Keynote
- Apple Numbers
- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Google Chrome
- Apple Safari
- MindView
- Zotero
- Mendeley
- Global AutoCorrect

And many others.
